

Job Description – Python Full Stack Developer (with React)

Position: Python Full Stack Developer

Location: Bhubaneswar, Odisha (On-Site)

Employment Type: Full-time

About the Role

We are looking for a Full Stack Developer with strong expertise in Python (backend) and React (frontend) to join our growing development team. The ideal candidate will be responsible for designing, developing, and maintaining scalable web applications while ensuring seamless integration between frontend and backend systems.

Key Responsibilities :

Design, develop, and deploy scalable web applications using Python frameworks (Django/Flask/FastAPI).

Build interactive, responsive, and user-friendly interfaces using React.js.

Develop and manage APIs and ensure smooth integration with front-end applications.

Optimize applications for maximum speed, performance, and security.

Collaborate with cross-functional teams including designers, testers, and project managers.

Troubleshoot, debug, and upgrade existing applications.

Write clean, maintainable, and well-documented code.

Stay updated with emerging technologies and apply best practices in software development.

Required Skills & Qualifications :

Bachelor's degree in Computer Science, Engineering, or a related field.

Proven experience as a Full Stack Developer or similar role.

Strong backend skills in Python (Django, Flask, or FastAPI).

Strong frontend development experience with React.js, Redux, JavaScript (ES6+), HTML5, CSS3.

Experience with RESTful APIs, GraphQL, and third-party integrations.

Familiarity with databases (MySQL, PostgreSQL, MongoDB).

Experience with version control tools like Git/GitHub/GitLab.

Strong problem-solving skills and attention to detail.
